FUZETEC TECHNOLOGY

Founded in 1997, as a world leading device manufacturer and designer, Fuzetec Technology Co., Ltd. (FUZETEC™) is committed to provide continuous circuit protection solutions to today's and tomorrow's electronic and electrical industries.

With the most advanced Positive Temperature Coefficient (PTC) conductive polymer technologies, FUZETEC™ offers a wide variety of Polymeric PTC resettable fuses to fulfill the needs of modern demanding high-tech applications. They include, but are not limited to: Telecommunications, Networks, Computers & Peripherals, Notebook PC's, Primary & Secondary Batteries, Automotives, Instrumentation & Industrial Controls, Power Supplies, and Consumer Electronics etc.

FUZETEC™ PRODUCT FAMILY

FUZETEC™ product families are designed for today's demanding electronic and electrical industries. Its resettable feature, compact size, flexible construction, low thermal output and competitive cost out performed the traditional fuse, Ceramic PTC, Bimetal fuse and Current control IC. They are ideal for all low voltage DC and AC application. FUZETEC™ resettable fuses are offered in a variety of constructions, which include: Radial Leaded (16V, 30V, 60V, 90V, 120Vac, 240 Vac, 250V & 600V), Surface Mount (0805, 1206, 1210, 1812 & 2920 sizes) & Axial Leaded for all battery pack applications. In addition to standard products we offer a flexible range of custom design devices (i.e. Disc Type).

SAFETY, QUALITY AND CUSTOMER SATISFACTION

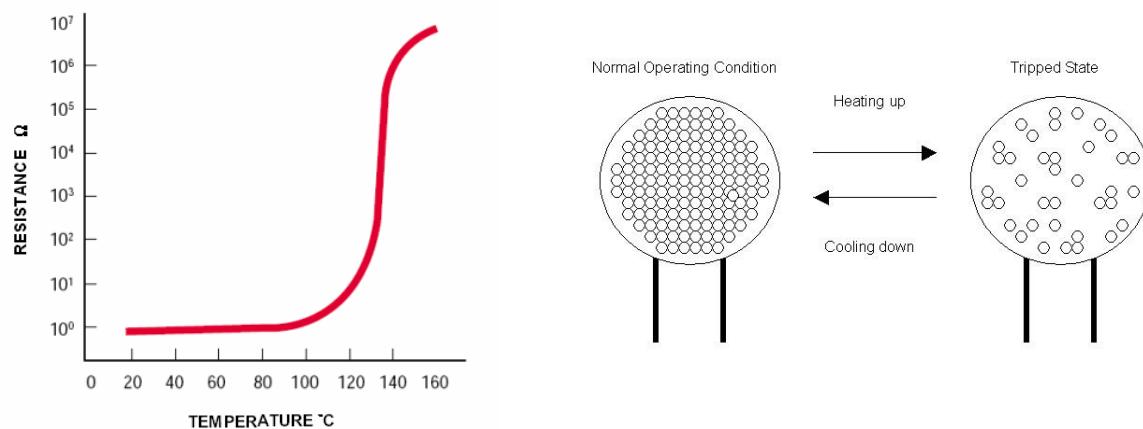

With third party approvals (UL, C-UL and TÜV), FUZETEC™ products are ensured to provide long lasting safety and performance. From product design and development, through manufacturing and quality control to delivery and shipment. Fuzetec Technology strictly implements ISO/TS16949:2002 ISO9001:2000 and ISO14001:2004 quality standards to assure its products' quality and consistency. With continuous improvement, we are committed to provide top products and services to better satisfy our customer's needs. We strongly believe that excellent partnership between customers and us are the best and the only route to achieve success in tomorrow's competing business world.

TECHNOLOGY NICHE

Polymeric PTC material and devices technology synergistically integrate the advanced polymer material technologies, conductive material science, novel processing engineering, and fundamental electronic and electrical theory. Electrical resistance of such material and devices increases with temperature increases and vice versa. When experiencing "overcurrent and/or over voltage", the device generates thermal energy (Energy = I^2V) and heats up itself. This makes the polymer matrix's morphology change from crystalline to amorphous phase, and results in a resistance increase of thousand orders of magnitude such that "trips" the electricity. The device will remain hot and stay "tripped" until the fault is cleared and power is removed.

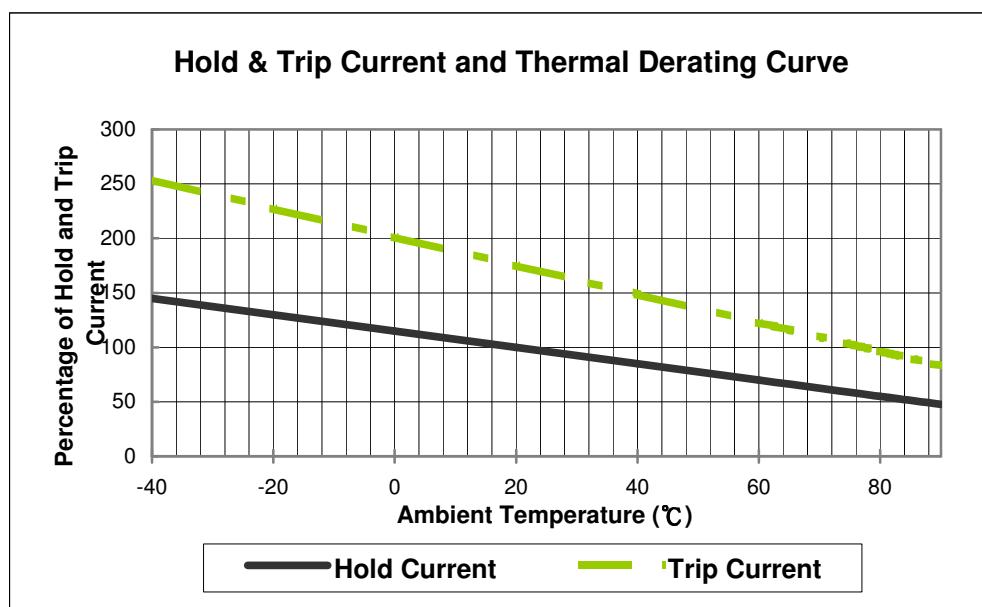

HOW DOES THE RESETTABLE FUSE WORK

FUZETEC™ resettable fuses are designed and made of patented novel polymeric PTC material in thin chip form, developed solely by FUZETEC™. With electrodes and leads attached on both sides, it is placed in series to protect a circuit. At “normal operating condition” the device remains at an extremely low resistance (milli-ohms) and allows the electrical current to flow through it without any restriction. When overcurrent conditions occur, the polymeric PTC material heats up and its resistance increases sharply. Such a sharp resistance increase (to an insulated status) cuts off the current in the circuit, and consequently protects the element and device in the circuit. Upon fault current being removed, the resettable fuse cools and its resistance drops to the original extremely low value. The resettable fuse is “reset” and allows the current through the circuit again.

TRIP CURRENT, HOLD CURRENT AND THERMAL DERATING

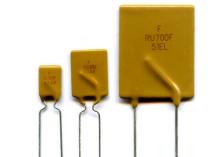

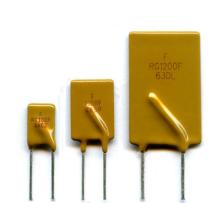

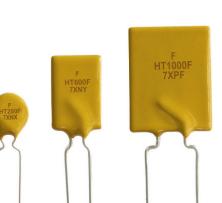

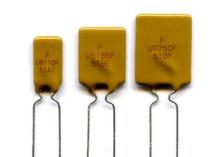

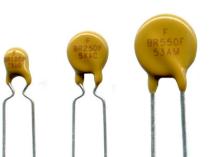

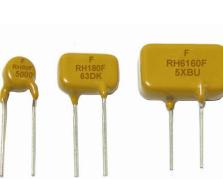

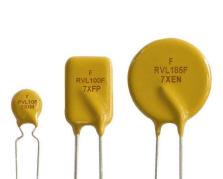

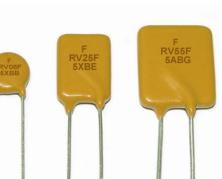

Trip Current (I_T) and Hold Current (I_H) of FUZETEC™ resettable fuse are rated at 23°C. Typically its Trip Current is twice as much as its Hold Current. FUZETEC™ device does not trip at or below its rated Hold Current, and will trip at or above its Trip Current value. However, due to PTC effect both I_T and I_H reduce with ambient temperature increase and vice versa. As shown below, the currents are reduced nearly 50% at 85°C and increased to 150% at -40°C.

PRODUCT SUMMARY

Radial Leaded (For Telecom & Electronic Equipment)

	<p>FRX</p> <p>Operation Current:0.05A ~3.75A VMAX:60V, IMAX: 40A. Wide Variety of Electronic Equipment</p>		<p>FRX90V</p> <p>Operation Current:0.10A ~3.75A VMAX:72V/90V, IMAX: 40A. Wide Variety of Electronic Equipment</p>

PRODUCT SUMMARY

Surface Mount (For High Density Board)

FSMD2920 Operation Current: 0.30A ~3.00A VMAX:6V~60V, IMAX: 10A~40A. All High-Density Board	FSMD1812 Operation Current: 0.10A ~3.00A VMAX:6V~60V, IMAX: 10A~100A. All High-Density Board
FSMD1210 Operation Current:0.05A ~1.50A VMAX:6V~60V, IMAX: 10A~100A. All High-Density Board	FSMD1206 Operation Current:0.05A ~2.00A VMAX: 6V~60V, IMAX: 10A~100A. All High-Density Board
FSMD0805 Operation Current:0.10A~1.00A VMAX:6V~15V All High-Density Board	

Axial Leaded (For Rechargeable Battery Packs)

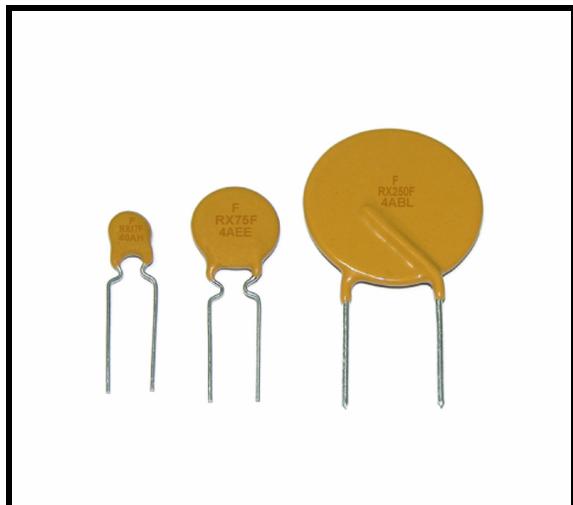

FVT Operation Current: 1.10A~2.40 A VMAX:16V, IMAX: 100A. Rechargeable battery packs, Lithium cell and battery packs	FVL Operation Current: 1.70A~2.30 A VMAX:12V, IMAX: 100A. Rechargeable battery packs, Lithium cell and battery packs
FSL Operation Current: 1.90A VMAX:6V, IMAX: 50A. Rechargeable battery packs, Lithium cell and battery packs	FSR Operation Current: 1.20A~4.20 A VMAX:15V/30V, IMAX: 100A. Rechargeable Battery Packs
FLR Operation Current: 1.90A~7.30 A VMAX:15V/20V, IMAX: 100A. Rechargeable Battery Packs	FLT Operation Current: 0.70A~3.40A VMAX:24V, IMAX: 100A. Rechargeable Battery Packs

Disk type (For Battery Cell and Charger)

Disc (Donut type) Custom Design Battery Cell and Charger

FRX Series

RoHS Compliant & Lead Free

RoHS 2002/95/EC	
	Lead Free

Application:

Wide variety of electronic equipment

Product Features:

Low hold current, Solid state

Radial-leaded product ideal for up to 60V

Operation Current: 0.05A ~ 3.75A

Maximum Voltage: 60V

Temperature Range: -40°C to 85°C

Agency Recognition: UL(E211981)

C-UL(E211981)

TÜV (R3-50004084)

I_H=Hold current-maximum current at which the device will not trip at 23°C still air.

I_T=Trip current-minimum current at which the device will always trip at 23°C still air.

V_{MAX}=Maximum voltage device can withstand without damage at its rated current.

I_{MAX}= Maximum fault current device can withstand without damage at rated voltage (Vmax).

Pd=Typical power dissipated from device when in the tripped state in 23°C still air environment.

R_{MIN}=Minimum device resistance at 23°C.

R_{1MAX}=Maximum device resistance at 23°C, 1 hour after tripping .

Physical specifications:

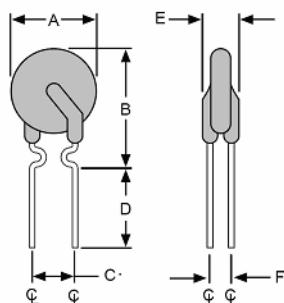

Lead material: FRX005-60F~FRX090-60F Tin plated copper, 24 AWG.

FRX110-60F~FRX375-60F Tin plated copper, 20 AWG.

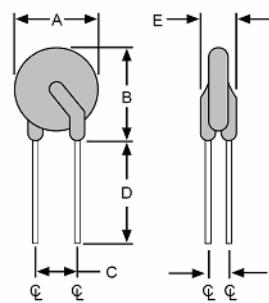

Soldering characteristics: MIL-STD-202, Method 208E.

Insulating coating:Flame retardant epoxy, meets UL 94 V-0 requirement.

Warning: -Operation beyond the specified maximum ratings or improper use may result in damage and possible electrical arcing and/or flame.

-PTC device are intended for occasional overcurrent protection. Application for repeated overcurrent condition and/or prolonged trip are not anticipated.

-Avoid contact of PPTC device with chemical solvent. Prolonged contact will damage the device performance.

Warning: -Operation beyond the specified maximum ratings or improper use may result in damage and possible electrical arcing and/or flame.

-PTC device are intended for occasional overcurrent protection. Application for repeated overcurrent condition and/or prolonged trip are not anticipated.

-Avoid contact of PPTC device with chemical solvent. Prolonged contact will damage the device performance.

FBR Series

RoHS Compliant & Lead Free

RoHS 2002/95/EC	
	Lead Free

Application:

Cable /Telephone Electronics: Cable Power Passing Tap.

Product Features:

Low hold current, Solid state, Radial-leaded product ideal for up to 90V

Operation Current: 0.1A~0.9A

Maximum Voltage: 90V

Temperature Range: -40°C to 85°C

Agency Recognition: UL (E211981)

C-UL(E211981)

*TÜV (R50004084)

Electrical Characteristics (23°C)

I_H=Hold current-maximum current at which the device will not trip at 23°C still air.

I_T=Trip current-minimum current at which the device will always trip at 23°C still air.

V_{MAX}=Maximum voltage device can withstand without damage at its rated current.

I_{MAX}= Maximum fault current device can withstand without damage at rated voltage (V_{MAX}).

Pd=Typical power dissipated from device when in tripped state in 23°C still air environment.

R_{MIN}=Minimum device resistance at 23°C.

R_{1MAX}=Maximum device resistance at 23°C, 1 hour after tripping .

Physical specifications:

Lead material: FBR100F~FBR350F Tin plated copper, 24 AWG.

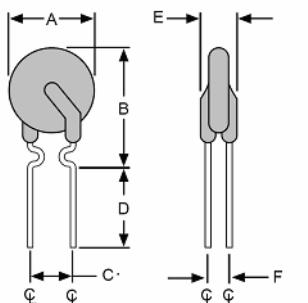

FBR200F~FBR900F Tin plated copper, 20 AWG.

Soldering characteristics: MIL-STD-202, Method 208E.

Insulating coating:Flame retardant epoxy, meets UL 94 V-0 requirement.

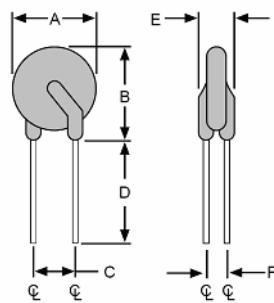

*NOTE : TÜV is only applied for FBR550(U)F~ FBR900(U)F

I_H=Hold current-maximum current at which the device will not trip at 23°C still air.

I_T=Trip current-minimum current at which the device will always trip at 23°C still air.

V_{MAX}=Maximum voltage device can withstand without damage at its rated current.

I_{MAX}= Maximum fault current device can withstand without damage at rated voltage (Vmax).

Pd=Typical power dissipated from device when in the tripped state in 23°C still air environment.

R_{MIN}=Minimum device resistance at 23°C.

R_{1MAX}=Maximum device resistance at 23°C, 1 hour after tripping .

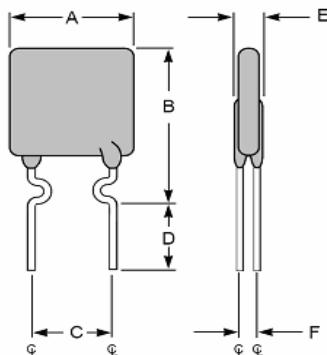

Physical specifications:

Lead material: FRG250-16F Tin plated copper, 24 AWG.

FRG300-16F~FRG1100-16F Tin plated copper,20 AWG.

FRG1200-16F~FRG1400-16F Tin plated copper,18 AWG.

Soldering characteristics: MIL-STD-202, Method 208E.

Insulating coating:Flame retardant epoxy, meets UL 94 V-0 requirement.

Warning: -Operation beyond the specified maximum ratings or improper use may result in damage and possible electrical arcing and/or flame.

-PPTC device are intended for occasional overcurrent protection. Application for repeated overcurrent condition and/or prolonged trip are not anticipated.
 -Avoid contact of PPTC device with chemical solvent. Prolonged contact will damage the device performance.

FHT Series

RoHS Compliant & Lead Free

RoHS 2002/95/EC	
	Lead Free

Application:

Wide variety of electronic equipment

Product Features:

Very Low resistance, Very High hold current, Solid state,
Radial leaded product ideal for up to 16V/30 and Operating
temperatures up to 125°C.

Operation Current: 0.5A~15.0A

Maximum Voltage: 16V/30V

Temperature Range: -40°C to 125°C

Agency Recognition: *UL(E211981)

*C-UL(E211981)

I_H=Hold current-maximum current at which the device will not trip at 23°C still air.

I_T=Trip current-maximum current at which the device will always trip at 23°C still air.

V_{MAX}=Maximum operating voltage at which the device can withstand without damage at its rated current.

V_{I-MAX} = Maximum interrupt voltage device can withstand for short period of time. (Not for long term.)

I_{MAX} = Maximum fault current device can withstand without damage at rated voltage (V MAX).

Pd=Typical power dissipated from device when in the tripped state in 23°C still air environment.

R_{MIN}=Minimum device resistance at 23°C.

R_{1 MAX}=Maximum device resistance at 23°C 1 hour after tripping .

Physical specifications:

Lead material: FRH080-250VF ~ FRH180-250VF Tin plated copper,22 AWG.

FRH150-600VF ~ FRH160-600VF Tin plated copper,22 AWG.

Soldering characteristics:MIL-STD-202, Method 208E.

Insulating coating:Flame retardant epoxy ,meet UL 94 V-0 requirement.

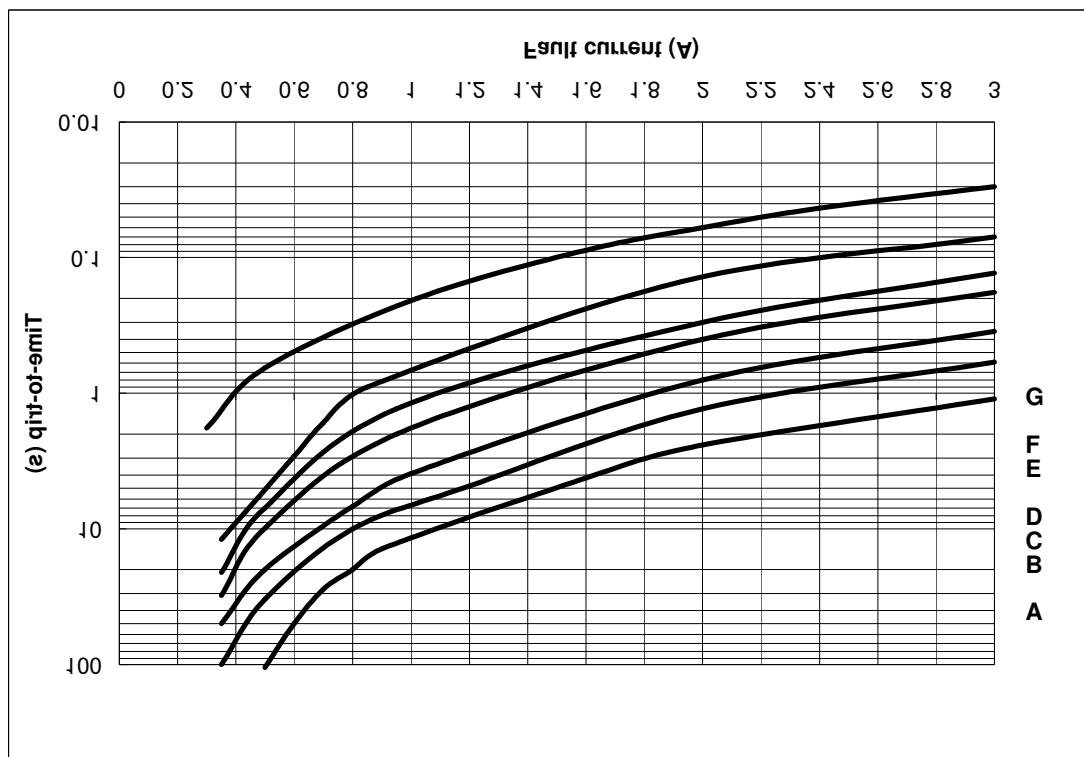

NOTE : All FRH products are designed to assist equipment to pass ITU, UL1950 or GR1089 specification.

CAUTION : FRH devices are not intended for continuous use of Line Voltage such as 120 VAC ~ 600VAC and above.

- Warning:**
- Operation beyond the specified maximum ratings or improper use may result in damage and possible electrical arcing and/or flame.
 -  -PTC device are intended for occasional overcurrent protection. Application for repeated overcurrent condition and/or prolonged trip are not anticipated.
 - Avoid contact of PPTC device with chemical solvent. Prolonged contact will damage the device performance.

FSMD2920 Series

**RoHS Compliant &
Lead Free**

Application:

All high-density boards

Product Features: 2920 Dimension, Surface mountable, Solid state, Faster time to trip than standard SMD devices.

Operation Current: 0.3A~3.0A

Maximum Voltage: 6V~60V

Temperature Range: -40°C to 85°C

Agency Recognition: UL (E211981)

C-UL (E211981)

*TÜV (R50090556)

Electrical Characteristics (23°C)

I_H=Hold current-maximum current at which the device will not trip at 23°C still air.

I_T=Trip current-minimum current at which the device will always trip at 23°C still air.

V_{MAX}=Maximum voltage device can withstand without damage at it rated current.(I_{MAX})

I_{MAX}= Maximum fault current device can withstand without damage at rated voltage (V_{MAX}).

Pd=Typical power dissipated-type amount of power dissipated by the device when in the tripped state in 23°C still air environment.

R_{MIN}=Minimum device resistance at 23°C prior to tripping.

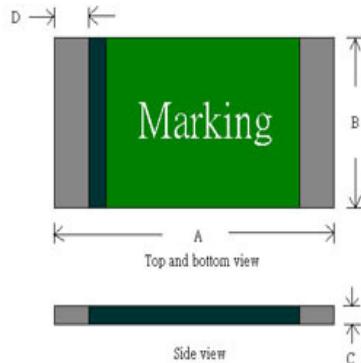

R_{1MAX}=Maximum resistance of device at 23°C measured 1 hour after tripping or reflow soldering of 260°C for 20 seconds.

Termination pad characteristics

Termination pad materials: Pure Tin

*Note:FSMD300-2920 TÜV Pending

Warning: -Operation beyond the specified maximum ratings or improper use may result in damage and possible electrical arcing and/or flame.

-PTC device are intended for occasional overcurrent protection. Application for repeated overcurrent condition and/or prolonged trip are not anticipated.

-Avoid contact of PPTC device with chemical solvent. Prolonged contact will damage the device performance.

FSMD0805 Series

RoHS Compliant & Lead Free

Application:

All high-density boards

Product Features:

Small surface mountable, Solid state, Faster time to trip than standard SMD devices, Lower resistance than standard SMD devices

Operation Current: 0.1A~1.0A

Maximum Voltage: 6V~15V

Temperature Range: -40°C to 85°C

Agency Recognition: UL (Pending)

C-UL (Pending)

TÜV (Pending)

Electrical Characteristics(23°C)

Warning:

- Operation beyond the specified maximum ratings or improper use may result in damage and possible electrical arcing and/or flame.
- PTC device are intended for occasional overcurrent protection. Application for repeated overcurrent condition and/or prolonged trip are not anticipated.
- Avoid contact of PPTC device with chemical solvent. Prolonged contact will damage the device performance.

FVL Series

RoHS Compliant & Lead Free

Application:

Laptop Computer, Rechargeable battery packs, Lithium cell and battery packs

Product Features:

Low profile, Solid state

Operation Current: 1.7~2.3A

Maximum Voltage: 12V

Temperature Range: -40°C to 85°C

Agency Recognition: UL (Pending)

C-UL (Pending)

TÜV (Pending)

Electrical Characteristics(23°C)

Part Number	Hold Current	Trip Current	Rated Voltage	Max. Current	Typical Power	Resistance Tolerance		
						RMIN	RMAX	R1MAX
	I _H ,A	I _T ,A	V _{MAX} , VDC	I _{MAX} , A	P _d , W	Ohms	Ohms	Ohms
FVL170F	1.7	4.1	12	100	1.4	0.018	0.032	0.064
FVL175F	1.75	4.2	12	100	1.4	0.017	0.031	0.062
FVL230F	2.3	5.0	12	100	1.4	0.012	0.018	0.036

I_H=Hold current-maximum current at which the device will not trip at 23°C still air.

I_T=Trip current-minimum current at which the device will always trip at 23°C still air.

V_{MAX}=Maximum voltage device can withstand without damage at its rated current.

I_{MAX}= Maximum fault current device can withstand without damage at rated voltage (V_{MAX}).

P_d=Maximum power dissipated from device when in tripped state in 23°C still air environment.

R_{MIN}=Minimum device resistance at 23°C.

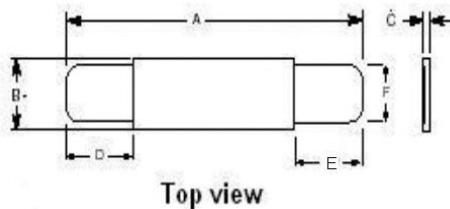

R_{1MAX}=Maximum device resistance at 23°C, 1 hour after tripping.

Physical specifications:

Lead material: 0.10mm nominal thickness, quarter-hard nickel.

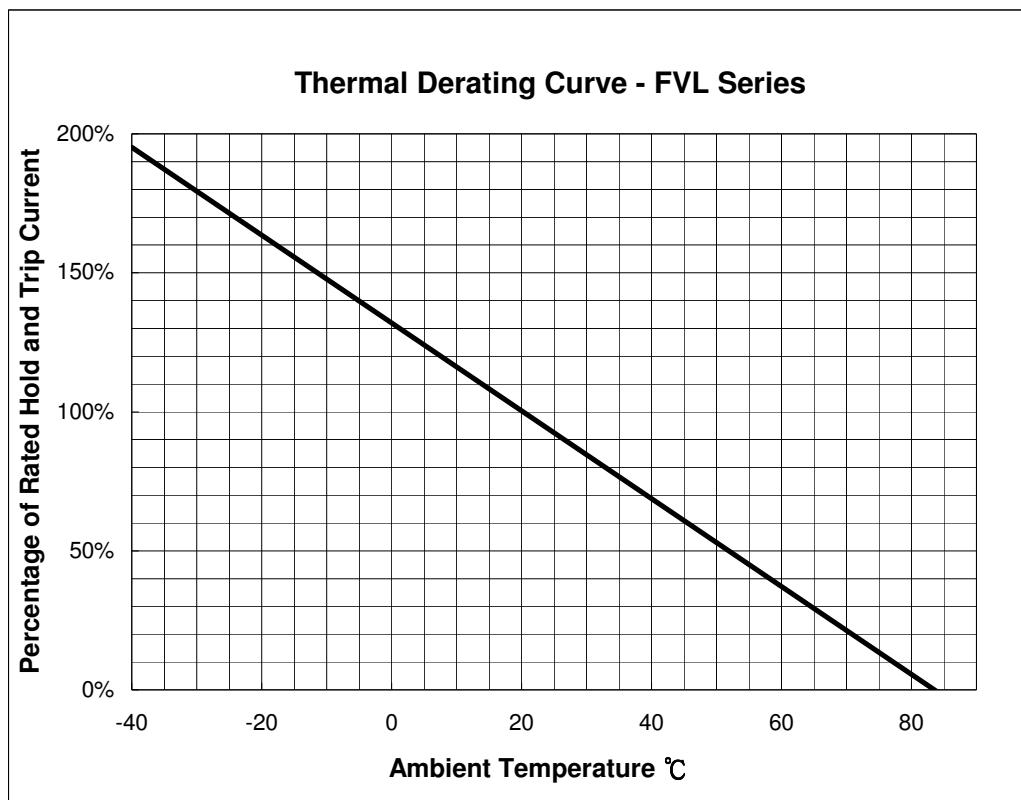

Insulating material: Polyester tape.

The conductive carbon black particles in Fuzetec's PPTC resettable fuses are dispersed in a polymer that has a crystalline structure. At normal operating conditions there are numerous carbon chains forming conductive paths through the material. Under fault conditions (Tripped State), excessive current flows through the PPTC device and the PTC material heats up making the conductive particles move apart from each other, most of them no longer conduct current and the resistance of the device increases sharply. Upon fault current being removed, the resettable fuse is resetted and allows the current through the circuit again.

When connected in series to a circuit, Fuzetec's PPTC resettable fuses remain at extremely low resistance and allow the electrical current to flow through it without any restriction. When overcurrent situations occur, Fuzetec PPTC resettable fuses limit the current to a very small value and therefore protect the circuit from being damaged by the high current.

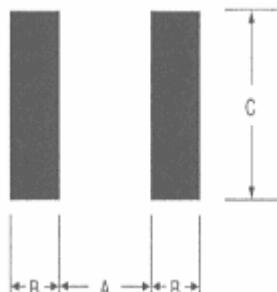

PPTC Applications by Industry

Telecom & Communications	ADSL, VDSL Cable modems, Set Top Box	Customer Premise Equipment/UL-1495
	MDF Module	Telecom Network Equipment
Computer / Consumer Electronics	Mother board	Printer, Scanner, Modem
	USB & IEEE1394 & I/O Card	Digital Audio & Vedio Equipment
	Portable Game	GPS Navigation
	Power Supply Devices	Test & Measurement Equipment
Industrial, Power Supply & Other Electronics	Ballast	Industrial Process Controls
	Motors, Fans & Blowers	Speakers
	Security & Fire Alarm Systems	Other Consumer Electronics
	Automobile cigar-lighter adapters (CLAs)	
Automotive Industry	Wire Harness	
	Automotive Security Alarm & other Automotive Electronics	
	Automotive actuators & motors (i.e. Power Windows)	
	PCM Module; Battery Cell & Battery Packs	
Battery & Portable Electronics	Battery Chargers	
	Notebook, PDA & Cellphone Batteries	

Pad Layouts & Solder Reflow Recommendations

The dimensions in the table below provide the recommended pad layout for Surface Mount Device in different footprints.

Pad dimensions(Millimeter)			
Device	A Nominal	B Nominal	C Nominal
All 2920 Series	5.10	2.30	5.60
All 1812 Series	3.45	1.78	3.50
All 1210 Series	2.00	1.00	2.80
All 1206 Series	1.20	1.00	1.50
All 0805 Series	1.20	1.00	1.50

Profile Feature	Pb-Free Assembly
Average Ramp-Up Rate (Tsmax to Tp)	3 °C/second max.
Preheat :	
Temperature Min (Tsmin)	150 °C
Temperature Max (Tsmax)	200 °C
Time (tsmin to tsmax)	60-180 seconds
Time maintained above:	
Temperature(T _L)	217 °C
Time (t _L)	60-150 seconds
Peak/Classification Temperature(Tp) :	260 °C
Time within 5°C of actual Peak :	
Temperature (tp)	20-40 seconds
Ramp-Down Rate :	6 °C/second max.
Time 25 °C to Peak Temperature :	8 minutes max.

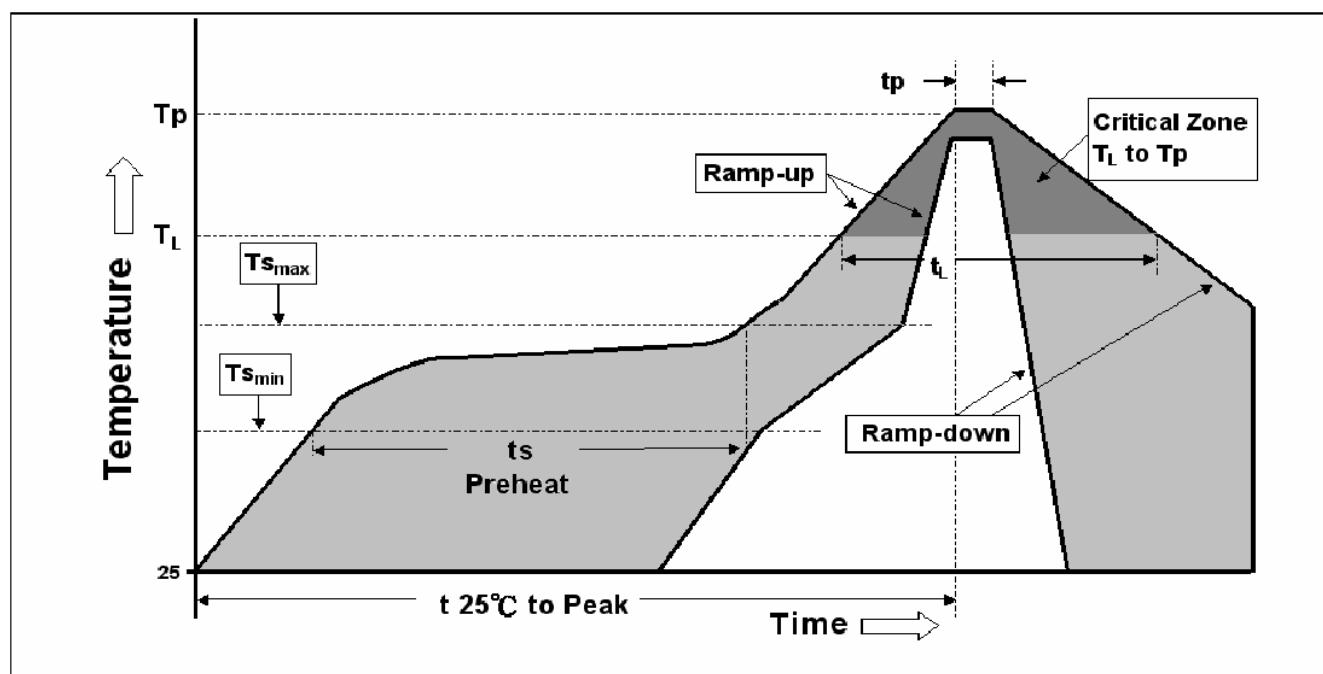

Note 1: All temperatures refer to the package, measured on the package body surface.

Solder reflow

- ※ Due to "Lead Free" nature, Temperature and Dwelling Time for the soldering zone is higher than those for Regular. This may cause damage to other components.
- 1. Recommended max paste thickness > 0.25mm.
- 2. Devices can be cleaned using standard methods and aqueous solvent.
- 3. Rework use standard industry practices.
- 4. Storage Environment : < 30°C / 60%RH

Caution:

1. If reflow temperatures exceed the recommended profile, devices may not meet the performance requirements.
2. Devices are not designed to be wave soldered to the bottom side of the board

Fill in the following BLANKS to help us out in suggesting the “Right” product for your applications.

1. Determine the followings to define your circuit operation parameter,

Normal operating current : _____ Typical fault current: _____

Normal operating voltage : _____ Required opening time at fault: _____

Maximum interrupt current: _____ Form factor: _____

Maximum operating voltage: _____

Maximum Ambient Temperature/ Derating : Between _____ °C and _____ °C

Typical resistance (in circuit): _____ Agency approvals: _____

2. Select the appropriate Fuzetec series from the table listed below:

Fuzetec Family	Voltage	Hold Current	Form factor	Application
FRX	60V	0.05A~3.75A	Radial Leaded	Wide Variety of Electronic Equipment
FRX90V	72V/90V	0.10A~3.75A	Radial Leaded	Wide Variety of Electronic Equipment
FBR	90V	0.10A~0.90A	Radial Leaded	Cable/Telephone Electronic
FRU	30 V	0.90A~9.00A	Radial Leaded	Wide Variety of Electronic Equipment
FRT	36V	0.50A~2.50A	Radial Leaded	Wide Variety of Electronic Equipment
FUSB	16V/30V	0.75A~2.50A	Radial Leaded	Low Voltage USB Equipment
FRG	16V	2.5A~14.0A	Radial Leaded	Wide Variety of Electronic Equipment
FHT	16V/30V	0.50A~15.00A	Radial Leaded	Operating temperatures up to 125°C.
FRHV	100V/250V/600V	0.08A~0.18A	Radial Leaded	Wide Variety of Electronic Equipment
FRH	60V/250V/600V	0.08A~0.18A	Radial Leaded	Telecommunication and Net Work
FRVL	120VAC/DC	0.10A ~3.75A	Radial Leaded	Line Voltage application
FRV	240VAC/DC	0.50A~2.00A	Radial Leaded	Line Voltage Power Supply, Transformer and Appliances
FRA(Obsolete)	120VAC/DC	0.10A~3.75A	Radial Leaded	Electrical & Electronic Appliance
FSMD 2920	6V~60V	0.30A~3.00A	Surface Mount	All High-Density Board
FSMD 1812	6V~60V	0.10A~3.00A	Surface Mount	All High-Density Board
FSMD 1210	6V~60V	0.05A ~0.75A	Surface Mount	All High-Density Board
FSMD 1206	6V~60V	0.05A ~1.50A	Surface Mount	All High-Density Board
FSMD 0805	6V~15V	0.10A~1.00A	Surface Mount	All High-Density Board
FSR	15V/30V	1.2A~4.2A	Axial Leaded	Rechargeable Battery Packs
FLR	15V/20V	1.9A~7.3A	Axial Leaded	Rechargeable Battery Packs
FLT	24V	0.7A ~3.4A	Axial Leaded	Rechargeable Battery Packs
FVT	16V	1.10A~2.40 A	Axial Leaded	Rechargeable battery packs, Lithium cell and battery packs
FVL	12V	1.70A~2.30 A	Axial Leaded	Rechargeable battery packs, Lithium cell and battery packs
FSL	6V	1.90A	Axial Leaded	Rechargeable battery packs, Lithium cell and battery packs

3. Fill in the followings:

a) Quantity of samples requested: _____

b) Application Type: _____

c) Company name: _____

d) Address: _____

Contact Person: _____ Position : _____

Tel: _____ Fax: _____

E-mail: _____ Website: _____

e) Type of Business:
